CHAIRMAN'S LETTER

30 October 2009

Dear Fellow Shareholder,

Non-Renounceable Rights Issue

I am pleased to write to you regarding the Flinders Mines Limited (**Flinders or Company**) 1 for 7 non-renounceable rights issue at a price of \$0.13 per New Share (**Rights Issue**).

The Rights Issue seeks to raise approximately \$29.6 million which, coupled with our recently announced placement (to raise a total of \$52.8 million), will ensure that your Company maintains a well funded and aggressive development programme into 2010. Flinders is at an exciting time in its development and we believe that the emerging fundamentals for the Pilbara Iron Ore project clearly demonstrate the potential for a long life iron ore operation.

The Rights Issue price of \$0.13 per New Share allows existing Flinders shareholders to subscribe for New Shares at a discount of approximately 10% to the recently announced institutional placement price.

You will find enclosed the following important information:

- Summary of Important Dates;
- Key Terms for the Rights Issue;
- instructions on "How to Participate in the Rights Issue" setting out how to accept all or part of your entitlement under the Rights Issue; and
- a personalised Entitlement and Acceptance Form which details your Entitlement, to be completed in accordance with the instructions provided.

It is important to note that the Rights Issue closes at 5.00pm (Adelaide time) on Monday, 30 November 2009. To participate, you need to ensure that your completed Entitlement and Acceptance Form is received by Flinders before this time and date OR you have paid your application monies via BPay® pursuant to the instructions set out on the Entitlement and Acceptance Form.

Entitlements are non-renounceable and will not be tradeable on ASX or otherwise transferable.

If you have any questions in respect of the Offer, please call the Company's share registry, Computershare Investor Services Pty Limited, on 1300 556 161 between 9.00am and 5.00pm (Adelaide time) Monday to Friday before the Closing Date or, alternatively, consult your stockbroker, accountant or other professional adviser.

3. SUMMARY OF RISKS

As with all investments, investors should be aware that the market price of Shares may fall as well as rise. The potential returns of the Company will be exposed to risks specific to the Company and to general investment risks. While it is impossible to identify all risks, the attention of investors is drawn to the following particular risks:

3.1 General Risks

General Market Conditions

The price of the Shares on ASX may rise or fall due to numerous factors including:

- general economic conditions, including inflation rates and interest rates;
- variations in the local and global markets for listed shares in general, or for mining stocks in particular;
- changes to government policy, legislation (including any emissions trading scheme legislation) or regulation;
- competition in the industry in which the Company operates; and
- general operational and business risks.

In particular, the share prices of many companies have in recent times been subject to wide fluctuations, which in many circumstances arise by reason of matters outside the control of the Company, including global hostilities and tensions and the general state of the economy. Such market fluctuations may materially adversely affect the market price of the New Shares.

There can also be no guarantee that an active market in the Shares will develop or that the price of the Shares will increase. There may be relatively few, or many potential buyers or sellers of the New Shares on ASX at any given time. This may increase the volatility of the market price of the New Shares, and the prevailing market price at which shareholders are able to sell their New Shares.

The matters set out above may result in Shareholders receiving a price for their New Shares that is more or less than the Offer price.

Commodity Prices

The Company is exploring for commodities, predominantly iron ore. Any decision to mine ore containing economic quantities of these commodities will be closely related to the price of these commodities.

The demand for and price of commodities is influenced by a variety of factors including the level of forward selling by producers, costs of production, general economic conditions, the level of inflation, interest rates and currency exchange rates.

3.2 Risks specific to the Company

Future Capital Requirements

The Company may require additional capital to fund further exploration/development of its existing or new projects. The Company's ability to raise sufficient further capital within an acceptable time frame and on terms acceptable to it will vary according to a number of factors including (without limitation) the prospects of new projects (if any), the results of exploration and subsequent feasibility studies, stock market and industry conditions and the price of relevant commodities.

Exploration and Development

Exploration by its nature contains elements of significant risk. Ultimate success depends on the discovery of economically recoverable resources, obtaining the necessary titles and governmental regulatory approvals and obtaining and servicing of funding for mining operations if and when a decision to mine is made.

There can be no assurance that the Company's existing projects or any other projects or tenements that the Company may acquire in the future will result in the discovery of significant resources. Even if significant resources are identified, there can be no guarantee that they will be able to be economically exploited.

The current and future operations of the Company, including exploration, appraisal and possible production activities may be affected by a range of factors, including:

- geological conditions;
- limitations on activities due to seasonal weather patterns;
- alterations to joint venture programmes and budgets;
- the availability of drilling rigs and other machinery necessary for the Company to undertake its activities;
- unanticipated operational and technical difficulties encountered in survey, drilling and production activities;
- mechanical failure of operating plant and equipment, adverse weather conditions, industrial and environmental accidents, industrial disputes and other force majeure events;
- unexpected shortages or increases in the costs of consumables, spare parts, plant and equipment; and
- prevention or restriction of access by reason of political unrest, outbreak of hostilities, and inability to obtain consents or approvals (including clearance of work programs pursuant to existing, and any future access agreements entered into with the traditional land owners).

Loss of Key Personnel

The Company's success depends on the competencies of its Directors and senior management. The loss of one or more of the Directors or senior management could have a materially adverse effect on the Company's business, financial position and results of operations. The resulting impact from such an event would depend on the quality of any replacement.

Native Title & Aboriginal Heritage

Some of the Company's tenements are located within areas that are the subject of claims or applications for native title determination. The *Native Title Act 1993* (Cth) and related State native title legislation and aboriginal heritage legislation may affect the Company's ability to obtain access to certain of its exploration areas or to obtain mining production titles. Settling any such claims will incur costs to the Company. The degree to which this may impact on the Company's activities will depend on a number of factors, including the status of particular tenements and their locations. At this stage, the Company is not able to quantify the impact, if any, of such matters on its operations.

Title, Environmental Bonds & Conditions

All mining tenements which the Company may acquire either by application, sale and purchase or farm-in are regulated by applicable state mining legislation. There is no guarantee that applications will be granted as applied for. Various conditions may also be imposed as a condition of grant. In addition the relevant minister may need to consent to any transfer of a tenement to the Company.

Environment

The Company's projects are subject to State and Federal laws and regulations regarding environmental matters. Many of the activities and operations of the Company cannot be carried out without prior approval from and compliance with all relevant authorities. Resource activities can be environmentally sensitive and can give rise to substantial costs for environmental rehabilitation, damage control and losses. The Company intends to conduct its activities in an environmentally responsible manner and in accordance with all applicable laws.

Resource Estimates

Resource estimates are expressions of judgement based on knowledge, experience and industry practice. Estimates which were valid when made, may change significantly when new information becomes available. In addition, resource estimates are imprecise and depend to some extent on interpretations, which may prove to be inaccurate. Should the Company encounter mineralisation or formations different from those predicted by past sampling and drilling, resource estimates may have to be adjusted and mining plans altered in a way which could impact adversely on the operations of the Company.

Agreements with Third Parties

The Company is and will be subject to various contracts and agreements with third parties. There is a risk of financial failure or default by a counterparty to these arrangements. Any breach or failure may lead to penalties or termination of the relevant contract. In addition, the Company's interest in the relevant subject matter may be jeopardised.
