ANNEXURE A

1. Definition of Independence

A Director should only be characterised and described as independent if he or she is free of any interest, position, association or relationship that might influence, or reasonably be perceived to influence, in a material respect his or her capacity to bring an independent judgement to bear on issue before the Board and to act in the best interests of the entity and its security holders generally.

Examples of interests, positions, associations, and relationships that might cause doubts about the independence of a Director include if the Director:

- (a) is, or has been in the previous three years, employed in an executive capacity by the Company or another group member;
- (b) receives performance-based remuneration (including options or performance rights) from, or participates in an employee incentive scheme of, the Company;
- (c) is, or has been within the last three years, in a material business relationship (eg as a supplier, professional adviser, consultant or customer) with the Company or another group member, or an officer of, or otherwise associated with someone with such a relationship;
- (d) is, represents, or is or has within the last three years an officer or employee of, or professional adviser to, a substantial security holder of the Company;
- (e) has close family ties with any person who falls within any of the categories described above; or
- (f) has been a Director of the Company for such a period that his or her independence may have been compromised.

The materiality thresholds are assessed on a case-by-case basis, taking into account the relevant Director's specific circumstances, rather than referring to a general materiality threshold.
